The Federation of Mill Hill Primary and Woodcroft Primary schools **Safeguarding Policy**

This policy should be read in conjunction with the federation's Child Protection Policy and Staff Behaviour Policy/Code of Conduct.

Policy Statement

Safeguarding determines the actions that we take to keep children safe and protect them from harm in all aspects of their school life. As a federation, we are committed to safeguarding and promoting the welfare of all of our pupils.

The actions that we take to prevent harm; to promote wellbeing; to create safe environments; to educate on rights, respect and responsibilities; to respond to specific issues and vulnerabilities, all form part of the safeguarding responsibilities of the schools. As such, this overarching policy will link to other policies which will provide more information and greater detail.

Aims

- To provide staff with the framework to promote and safeguard the wellbeing of children and, in so doing, ensure they meet their statutory responsibilities
- To ensure consistent good practice across the schools
- To demonstrate our commitment to protecting children

Principles and Values

Safeguarding is everyone's responsibility. As such it does not rest solely with the Designated Safeguarding Lead (DSL) and their deputies to take a lead responsibility in all of the areas covered within this policy.

Some areas, such as Health and Safety, are a specialist area of safeguarding and a separate lead for this area is in place in the schools.

Safeguarding processes are intended to put in place measures that minimise harm to children. There will be situations where gaps or deficiencies in the policies and processes we have in place will be highlighted. In these situations, a review will be carried out in order to identify learning and inform the policy, practice and culture of the schools.

All pupils in our schools are able to talk to any member of staff to share concerns or talk about situations which are giving them worries. The staff will listen to the pupil, take their worries seriously and share the information with the safeguarding lead.

In addition, we provide pupils with information of who they can talk to outside of school, both within the community and with wider local or national organisations who can provide support or help.

As a federation, we review this policy at least annually in line with DfE, HSCB, HCC and any other relevant guidance.

Date Approved by Governing Body: September 2019

Areas of Safeguarding

Within Keeping Children Safe in Education (2018) and the Ofsted inspection guidance (2016), there are a number of safeguarding areas directly highlighted or implied within the text.

These areas of safeguarding have been separated into issues that are emerging or high risk issues (part 1); those related to the pupils as an individual (part 2); other safeguarding issues affecting pupils (part 3); and those related to the running of the schools (part 4).

Definitions

Within this document:

'Safeguarding' is defined in the Children Act 2004 as protecting from maltreatment; preventing impairment of health and development; ensuring that children grow up with the provision of safe and effective care; and work in a way that gives the best life chances and transition to adult hood. Our safeguarding practice applies to every child.

The term **Staff** applies to all those working for or on behalf of the schools in the federation, full time or part time, in either a paid or voluntary capacity. This also includes parents and Governors.

Child refers to all young people who have not yet reached their 18th birthday. On the whole, this will apply to pupils of our school; however, the policy will extend to visiting children and students from other establishments

Parent refers to birth parents and other adults in a parenting role; for example, adoptive parents, guardians, step parents and foster carers.

Key personnel

The designated safeguarding leads for the schools are:

Mill Hill Primary – Tracy Morgan
Woodcroft Primary – Barry Fanning

The deputy designated safeguarding leads are:

Mill Hill Primary – Claire Branscombe, Paula Smith and Yvonne Dixon
Woodcroft Primary – Dawn Pink, Anne Bartlett, Emma Wilkinson and Laura Sherwell

Part 1 – High risk and emerging safeguarding issues

Contextual Safeguarding

In KCSiE 2018 the DfE refer to contextual safeguarding as a specific term that has come out of research from the University of Bedfordshire.

The definition of Contextual Safeguarding is *“an approach to understanding, and responding to, young people’s experiences of significant harm beyond their families. It recognises that the different relationships that young people form in their neighbourhoods, schools and online can feature violence and abuse. Parents and carers have little influence over these contexts, and young people’s experiences of extra-familial abuse can undermine parent-child relationships. Therefore, children’s social care practitioners need to engage with individuals and sectors who do have influence over/within extra-familial contexts, and recognise that assessment of, and intervention with, these spaces are a critical part of safeguarding practices. Contextual Safeguarding, therefore, expands the objectives of child protection systems in recognition that young people are vulnerable to abuse in a range of social contexts.”*

For us as a federation, we will consider the various factors that have an interplay with the life of any pupil about whom we have concerns within the schools and the level of influence that these factors have on their ability to be protected and remain free from harm, particularly when it comes to child exploitation or criminal activity.

While this term applies to this specific definition, the notion of considering a child within a specific context is also important. What life is like for a child outside the school gates, within the home, within the family and within the community are key considerations when the DSL is looking at any concerns.

Preventing Radicalisation and Extremism

The prevent duty requires that all staff are aware of the signs that a child may be vulnerable to radicalisation. The risks will need to be considered for political; environmental; animal rights; or faith based extremism that may lead to a child becoming radicalised. All staff have received prevent WRAP training/undertaken e-learning/received awareness training in order that they can identify the signs of children being radicalised.

As part of the preventative process, resilience to radicalisation will be built through the promotion of fundamental British values through the curriculum.

Any child who is considered vulnerable to radicalisation will be referred by the DSL to Hampshire children’s social care, where the concerns will be considered in the MASH process. If the police prevent officer considers the information to be indicating a level

of risk, a “channel panel” will be convened and the school will attend and support this process.

Gender based violence / Violence against women and girls

<https://www.gov.uk/government/policies/violence-against-women-and-girls>

The government has a strategy looking at specific issues faced by women and girls. Within the context of this safeguarding policy, the following sections relate to how we respond to violence against girls. Female genital mutilation, forced marriage, honour based violence and teenage relationship abuse all fall under this strategy.

Female Genital Mutilation (FGM)

FGM comprises all procedures involving partial or total removal of the external female genitalia or other injury to the female genital organs for non-medical reasons. It has no health benefits and harms girls and women in many ways. It involves removing and damaging healthy and normal female genital tissue, and hence interferes with the natural function of girls’ and women’s bodies.

The age at which girls undergo FGM varies enormously according to the community. **The procedure may be carried out when the girl is newborn, during childhood or adolescence, just before marriage or during the first pregnancy.** However, the majority of cases of FGM are thought to take place between the ages of 5 and 8 and therefore girls within that age bracket are at a higher risk. **FGM is illegal in the UK.**

On the 31 October 2015, it became mandatory for teachers to report known cases of FGM to the police. ‘Known’ cases are those where either a girl informs the person that an act of FGM, however described, has been carried out on her, or where the person observes physical signs on a girl appearing to show that an act of FGM has been carried out and the person has no reason to believe that the act was, or was part of, a surgical operation within section 1(2)(a) or (b) of the FGM Act. In these situations, the DSL and/or head will be informed and that person or the member of teaching staff will call the police to report suspicion that FGM has happened. **At no time will staff examine pupils to confirm this.**

For cases where it is believed that a girl may be vulnerable to FGM or there is a concern that she may be about to be genitally mutilated, the staff will inform the DSL who will report it as with any other child protection concern.

While FGM has a specific definition, there are other abusive cultural practices which can be considered harmful to women and girls. Breast ironing is one of five UN defined ‘forgotten crimes against women’. It is a practice whereby the breasts of girls typically aged 8-16 are pounded using tools such as spatulas, grinding stones, hot stones, and hammers to delay the appearance of puberty. This practice is considered to be abusive and should be referred to children’s social care

Forced Marriage

In the case of children: *'a forced marriage is a marriage in which one or both spouses cannot consent to the marriage and duress is involved. Duress can include physical, psychological, financial, sexual and emotional pressure.'* In developing countries 11% of girls are married before the age of 15. One in 3 victims of forced marriage in the U.K. are under 18.

It is important that all members of staff recognise the presenting symptoms, how to respond if there are concerns and where to turn for advice.

Advice and help can be obtained nationally through the Forced Marriage Unit and locally through the local police safeguarding team or children's social care. Policies and practices in this federation reflect the fact that while all members of staff, including teachers, have important responsibilities with regard to pupils who may be at risk of forced marriage, teachers and school leaders should not undertake roles in this regard that are most appropriately discharged by other children's services professionals, such as police officers or social workers.

Characteristics that may indicate forced marriage

While individual cases of forced marriage, and attempted forced marriage, are often very particular, they are likely to share a number of common and important characteristics, including:

- an extended absence from school/college, including truancy;
- a drop in performance or sudden signs of low motivation;
- excessive parental restriction and control of movements;
- a history of siblings leaving education to marry early;
- poor performance, parental control of income and students being allowed only limited career choices;
- evidence of self-harm, treatment for depression, attempted suicide, social isolation, eating disorders or substance abuse; and/or
- evidence of family disputes/conflict, domestic violence/abuse or running away from home.

On their own, these characteristics may not indicate forced marriage. However, it is important to be satisfied that where these behaviours occur, they are not linked to forced marriage. It is also important to avoid making assumptions about an individual pupil's circumstances or act on the basis of stereotyping. For example, an extended holiday may be taken for entirely legitimate reasons and may not necessarily represent a pretext for forced marriage.

Honour Based Violence

Honour based violence is a violent crime or incident which may have been committed to protect or defend the honour of the family or community.

It is often linked to family or community members who believe someone has brought shame to their family or community by doing something that is not in keeping with their unwritten rule of conduct. For example, honour based violence might be committed against people who:

- become involved with a boyfriend or girlfriend from a different culture or religion
- want to get out of an arranged marriage
- want to get out of a forced marriage
- wear clothes or take part in activities that might not be considered traditional within a particular culture
- convert to a different faith from the family.

Women and girls are the most common victims of honour based violence; however, it can also affect men and boys. Crimes of 'honour' do not always include violence. Crimes committed in the name of 'honour' might include:

- domestic abuse
- threats of violence
- sexual or psychological abuse
- forced marriage
- being held against your will or taken somewhere you don't want to go
- assault

If staff believe that a pupil is at risk from honour based violence, the DSL will follow the usual safeguarding referral process; however, if it is clear that a crime has been committed or the pupil is at immediate risk, the police will be contacted in the first place. It is important that if honour based violence is known or suspected that communities and family members are NOT spoken to prior to referral to the police or social care as this could increase risk to the child.

Teenage Relationship Abuse

Research has shown that teenagers do not understand what constitutes abusive behaviours and controlling behaviours which could escalate to physical abuse, e.g. checking someone's 'phone, telling them what to wear, who they can/can't see or speak to; or that this abuse is prevalent within teenage relationships. Further research shows that teenagers are likely not to understand what consent means within their relationships. They often hold the common misconception that rape could only be committed by a stranger down a dark alley and do not understand or recognise that it could happen within their own relationships.

This can lead to these abusive behaviours feeling 'normal' and therefore left unchallenged as they are not recognised as being abusive.

In response to these research findings the school will provide education to help prevent teenagers from becoming victims and perpetrators of abusive relationships, by encouraging them to rethink their views of violence, abuse and controlling behaviours, and understand what consent means within their relationships.

Sexual Violence and Sexual Harassment Between Children

Sexual violence and sexual harassment can occur between two children of any age and sex. It can also occur through a group of children sexually assaulting or sexually harassing a single child or group of children.

Within our federation, all staff are made aware of what sexual violence and sexual harassment might look like and what to do if they have a concern or receive a report. Whilst any report of sexual violence or sexual harassment should be taken seriously, staff are aware it is more likely that girls will be the victims of sexual violence and sexual harassment and more likely it will be perpetrated by boys.

As a federation, we are clear that sexual violence and sexual harassment is not acceptable, will never be tolerated and is not an inevitable part of growing up. It cannot be described as ‘banter’, ‘having a laugh’ or ‘boys being boys’.

We will also take seriously any sharing of sexual images (photos, pictures or drawings) and videos; sexual jokes, comments or taunting either in person or on social media; or on-line sexual harassment.

Within the child protection policy, there is a clear procedure for how we deal with situations where sexual assaults or behaviour considered criminal between children has taken place.

As a federation, we will follow the “*Sexual violence and sexual harassment between children in schools and colleges*” advice provided by the DfE

We will challenge all contact behaviours that have a sexual nature to them, such as pushing or rubbing against, grabbing bottoms, breasts or genitals, pinching or flicking bras, lifting skirts or pulling down trousers and impose appropriate levels of disciplinary action, to be clear that these behaviours are not tolerated or acceptable.

Upskirting

In 2019 the Voyeurism Offences Act came into force and made the practice of upskirting illegal.

Upskirting is defined as someone taking a picture under another person’s clothing without their knowledge, with the intention of viewing their genitals or buttocks, with or without underwear. The intent of upskirting is to gain sexual gratification or to cause the victim humiliation, distress or alarm. If this is between pupils, we will follow the peer on peer abuse procedure.

If staff in the school are made aware that upskirting has occurred, then this will be treated as a sexual offence and reported accordingly.

There are behaviours that would be considered as sexual harassment which may be precursors to upskirting. The use of reflective surfaces or mirrors to view underwear or

genitals will not be tolerated and the school will respond to these with appropriate disciplinary action and education.

Pupils who place themselves in positions that could allow them to view underwear, genitals or buttocks, will be moved on. Repeat offenders will be disciplined. These locations could include stairwells, under upper floor walkways, outside changing areas and toilets or sitting on the floor or laying down in corridors.

If technology that is designed for covert placement and could be used to take upskirting or indecent images is discovered in the school, it will be confiscated. If the technology is in location and potentially may have captured images, this will be reported to the police and left in situ so that appropriate forensic measures can be taken to gather evidence.

Any confiscated technology will be passed to the head teacher to make a decision about what happens to the items and will be carried out under the principles set out in the government guidance on searching, screening and confiscation
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/674416/Searching_screening_and_confiscation.pdf

If the image is taken on a mobile phone, the phone will be confiscated under the same principles. This may need to be passed to the police for them to investigate, if there is evidence that a crime has been committed.

The Trigger Trio

The term ‘Trigger Trio’ has replaced the previous phrase ‘Toxic Trio’ which was used to describe the issues of domestic violence, mental ill-health and substance misuse which have been identified as common features of families where harm to women and children has occurred.

The above are viewed as indicators of increased risk of harm to children and young people. In an analysis of Serious Cases Reviews undertaken by Ofsted in 2011, they found that in nearly 75% of these cases two or more of the issues were present. These factors will have a contextual impact on the safeguarding of children and young people.

Domestic Abuse

Domestic abuse is any incident or pattern of incidents of controlling, coercive or threatening behaviour, violence or abuse between those aged 16 or over who are or have been intimate partners or family members, regardless of gender or sexuality. This can encompass, but is not limited to, the following types of abuse:

- Psychological
- Physical
- Sexual
- Financial
- Emotional

Controlling behaviour is a range of acts designed to make a person subordinate and/or dependent by isolating them from sources of support, exploiting their resources and capacities for personal gain, depriving them of the means needed for independence, resistance and escape and regulating their everyday behaviour.

Coercive behaviour is an act or a pattern of acts of assault, threats, humiliation and intimidation or other abuse that is used to harm, punish, or frighten their victim.

Research indicates that living within a home where domestic abuse takes place is harmful to children and can have a serious impact on their behaviour, wellbeing and understanding of what constitutes a normal relationship.

Children witnessing domestic abuse is recognised as ‘significant harm’ in law. These children may become aggressive; display anti-social behaviours; suffer from depression or anxiety; or fail to reach their educational potential.

Indicators that a child is living within a relationship with domestic abuse may include:

- being withdrawn
- suddenly behaving differently
- anxiety
- being clingy
- depression
- aggression
- problems sleeping
- eating disorders
- bed wetting
- soiling clothes
- excessive risk taking
- missing school
- changes in eating habits
- obsessive behaviour
- experiencing nightmares
- taking drugs
- use of alcohol
- self-harm
- thoughts about suicide

These behaviours themselves do not indicate that a child is living with domestic abuse, but should be considered as indicators that this may be the case.

If staff believe that a child is living with domestic abuse, this will be reported to the designated safeguarding lead for referral to be considered for children’s social care.

Parental mental health

The term ‘mental ill health’ is used to cover a wide range of conditions, from eating disorders, mild depression and anxiety to psychotic illnesses such as schizophrenia or

bipolar disorder. Parental mental illness does not necessarily have an adverse impact on a child's developmental needs, but it is essential to always assess its implications for each child in the family. It is essential that the diagnosis of a parent/carer's mental health is not seen as defining the level of risk. Similarly, the absence of a diagnosis does not equate to there being little or no risk.

For children, the impact of parental mental health can include:

- The parent / carer's needs or illnesses taking precedence over the child's needs
- Child's physical and emotional needs neglected
- A child acting as a young carer for a parent or a sibling
- Child having restricted social and recreational activities
- Child finding it difficult to concentrate, impacting on educational achievement
- A child missing school regularly as (s)he is being kept home as a companion for a parent / carer
- A child adopting paranoid or suspicious behaviour as they believe their parent's delusions
- Witnessing self-harming behaviour and suicide attempts (including attempts that involve the child)
- Obsessional compulsive behaviours involving the child.

If staff become aware of any of the above indicators, or others that suggest a child is suffering due to parental mental health, the information will be shared with the DSL to consider a referral to children's social care.

Parental Substance misuse

Substance misuse applies to the misuse of alcohol as well as 'problem drug use', defined by the Advisory Council on the Misuse of Drugs as drug use which has: 'serious negative consequences of a physical, psychological, social and interpersonal, financial or legal nature for users and those around them.

Parental substance misuse of drugs or alcohol becomes relevant to child protection when substance misuse and personal circumstances indicate that their parenting capacity is likely to be seriously impaired or that undue caring responsibilities are likely to be falling on a child in the family.

For children, the impact of parental substance misuse can include:

- Inadequate food, heat and clothing for children (family finances used to fund adult's dependency)
- Lack of engagement or interest from parents in their development, education or wellbeing
- Behavioural difficulties- inappropriate display of sexual and/or aggressive behaviour
- Bullying (including due to poor physical appearance)
- Isolation – finding it hard to socialise, make friends or invite them home
- Tiredness or lack of concentration
- Child talking of or bringing into school drugs or related paraphernalia
- Injuries /accidents (due to inadequate adult supervision)

- Taking on a caring role
- Continued poor academic performance, including difficulties completing homework on time
- Poor attendance or late arrival.

These behaviours themselves do not indicate that a child's parent is misusing substances, but should be considered as indicators that this may be the case.

If staff believe that a child is living with parental substance misuse, this will be reported to the designated safeguarding lead for referral to be considered for children's social care.

Missing, Exploited and Trafficked Children (MET)

Within Hampshire, the acronym MET is used to identify all children who are missing; believed to be at risk of or being exploited; or who are at risk of or are being trafficked. Given the close links between all of these issues, there has been a considered response to join all these issues, so that cross over of risk is not missed.

Children Missing from Education

Patterns of children missing education can be an indicator of either abuse or safeguarding risks. A relatively short length of time a child is missing does not reduce risk of harm to that child, and all absence or non-attendance should be considered with other known factors or concerns.

DSL's and staff should consider:

Missing lessons: Are there patterns in the lessons that are being missed? Is this more than avoidance of a subject or a teacher? Does the child remain on the school site or are they absent from the site?

- Is the child being exploited during this time?
- Are they late because of a caring responsibility?
- Have they been directly or indirectly affected by substance misuse?
- Are other pupils routinely missing the same lessons and does this raise other risks or concerns?
- Is the lesson being missed one that would cause bruising or injuries to become visible?

Single missing days: Is there a pattern in the day missed? Is it before or after the weekend suggesting the child is away from the area? Are there specific lessons or members of staff on these days? Is the parent informing the school of the absence on the day? Are missing days reported back to parents to confirm their awareness?

- Is the child being sexually exploited during this day?
- Do the parents appear to be aware and are they condoning the behaviour?
- Are the pupil's peers making comments or suggestions as to where the pupil is?
- Can the parent be contacted and made aware?

Continuous missing days: Has the school been able to make contact with the parent? Is medical evidence being provided? Are siblings attending school (either our or local schools)?

- Did we have any concerns about radicalisation, FGM, forced marriage, honour based violence, sexual exploitation?
- Have we had any concerns about physical or sexual abuse?
- Does the parent have any known medical needs? Is the child safe?

The federation will view absence as both a safeguarding issue and an educational outcomes issue. The schools may take steps that could result in legal action for attendance, or a referral to children's social care, or both.

Children Missing from Home or Care

Children who run away from home or from care, provide a clear behavioural indication that they are either unhappy or do not feel safe in the place of residence.

Research shows that children run away from conflict or problems at home or school, neglect or abuse, or because children are being groomed by predatory individuals who seek to exploit them. Many run away on numerous occasions.

The Association of Chief Police Officers has provided the following definitions and guidance:

Missing person is: 'Anyone whose whereabouts cannot be established and where the circumstances are out of character or the context suggests the person may be the subject of crime or at risk of harm to themselves or another.'

An absent person is: 'A person not at a place where they are expected or required to be.'

All cases classified as 'missing' by the police will receive an active police response – such as deployment of police officers to locate a child. Cases where the child was classified as 'absent' will be recorded by the police and risk assessed regularly but no active response will be deployed.

The absent case will be resolved when a young person returns or new information comes to light suggesting that he/she is at risk. In the latter instance, the case is upgraded to 'missing'.

Within any case of children who are missing, both push and pull factors will need to be considered.

Push factors include:

- Conflict with parents/carers
- Feeling powerless
- Being bullied/abused
- Being unhappy/not being listened to
- The Toxic Trio

Pull factors include:

- Wanting to be with family/friends
- Drugs, money and any exchangeable item
- Peer pressure
- For those who have been trafficked into the United Kingdom as unaccompanied asylum seeking children, there will be pressure to make contact with their trafficker.

As a federation, we will inform all parents of children who are absent (unless the parent has informed us). If the parent is also unaware of the location of their child, and the definition of 'missing' is met, we will either support the parent to contact the police to inform them or do so ourselves

Child Sexual Exploitation (CSE)

Child sexual exploitation is a form of child sexual abuse. It occurs where an individual or group takes advantage of an imbalance of power to coerce, manipulate or deceive a child or young person under the age of 18 into sexual activity (a) in exchange for something the victim needs or wants, and/or (b) for the financial advantage or increased status of the perpetrator or facilitator. The victim may have been sexually exploited even if the sexual activity appears consensual. Child sexual exploitation does not always involve physical contact; it can also occur through the use of technology (*Definition and a guide for practitioners, local leaders and decision makers working to protect children from child sexual exploitation, February 2017*).

- Exploitation can be isolated (one-on-one) or organised group/criminal activity
- There can be a big age gap between victim and perpetrator, but it can also be peer-on-peer
- Boys can be targeted just as easily as girls – this is not gender specific
- Perpetrators can be women and not just men
- Exploitation can be between males and females or between the same genders
- Children with learning difficulties can be particularly vulnerable to exploitation, as can children from particular groups, e.g. looked after children, young carers, children who have a history of physical, sexual emotional abuse or neglect or mental health problems, children who use drugs or alcohol, children who go missing from home or school, children involved in crime, children with parents/carers who have mental health problems, learning difficulties/other issues, children who associate with other children involved in exploitation. However, it is important to recognise that any child can be targeted.

Indicators a child may be at risk of CSE include:

- going missing for periods of time or regularly coming home late
- regularly missing school or education or not taking part in education
- appearing with unexplained gifts or new possessions
- associating with other young people involved in exploitation
- having older boyfriends or girlfriends
- suffering from sexually transmitted infections
- displaying mood swings or changes in emotional wellbeing

- drug and alcohol misuse
- displaying inappropriate sexualised behaviour.

CSE can happen to a child of any age, gender, ability or social status. Often the victim of CSE is not aware that they are being exploited and do not see themselves as a victim.

As a federation, we educate all staff in the signs and indicators of sexual exploitation. We use the sexual exploitation risk assessment form (SERAF) and associated guidance to identify pupils who are at risk and the DSL will share this information as appropriate with children's social care.

We recognise that we may have information or intelligence that could be used to both protect children and prevent risk. Any relevant information that we have will be shared on the community partnership information (CPI) form which can be downloaded from <https://www.safe4me.co.uk/portfolio/sharing-information/>

Child Criminal Exploitation (including county lines)

Child Criminal Exploitation is defined as: 'where an individual or group takes advantage of an imbalance of power to coerce, control, manipulate or deceive a child or young person under the age of 18 into any criminal activity (a) in exchange for something the victim needs or wants, and/or (b) for the financial or other advantage of the perpetrator or facilitator and/or (c) through violence or threat of violence. The victim may have been criminally exploited even if the activity appears consensual. Child Criminal Exploitation does not always involve physical contact; it can occur through the use of technology'.

The exploitation of children and young people for crime is not a new phenomenon, as evidenced by Fagan's gang in the Charles Dickens book, Oliver Twist. Children under the age of criminal responsibility, or young people who have increased vulnerability due to push/pull factors who are manipulated, coerced or forced into criminal activity, provide opportunity for criminals to distance themselves from crime.

A current trend in criminal exploitation of children and young people are 'county lines', which refers to a 'phone line through which drug deals can be made. An order is placed on the number and typically a young person will deliver the drugs to the specified address and collect the money for the deal. These lines are owned and managed by organised crime gangs, often from larger cities, who are expanding their markets into rural areas.

Indicators that a child may be criminally exploited include:

- Increase in **Missing episodes** – particularly key as children can be missing for days and drug run in other counties
- Having unexplained amounts of money, **new high cost items** and multiple mobile phones
- Increased social media and phone/text use, almost always secretly

- **Older males** in particular seen to be hanging around and driving
- Having injuries that are unexplained and unwilling to have them looked at
- Increase in **aggression, violence and fighting**
- Carrying **weapons** – knives, baseball bats, hammers, acid
- Travel receipts that are unexplained
- **Significant missing from education** episodes and disengaging from previous positive peer groups
- Parent concerns and significant changes in behaviour that affect emotional wellbeing.

We will treat any child who may be criminally exploited as a victim in the first instance and refer to children's social care in the first instance. If a referral to the police is also required as crimes have been committed on the school premises, these will also be made.

If there is information or intelligence about child criminal exploitation, we will report this to the police via the community partnership information form.

<https://www.safe4me.co.uk/portfolio/sharing-information/>

Serious Violence

Serious violence is becoming a factor for those who are involved in criminal exploitation. It can also be an indication of gang involvement and criminal activity.

All staff will be made aware of indicators, which may signal that pupils, or members of their families, are at risk from or involved with serious violent crime.

These indications can include but are not limited to: increased absence from school; a change in friendships or relationships with older individuals or groups; a significant decline in performance; signs of self-harm; significant change in wellbeing; signs of assault; unexplained injuries; unexplained gifts and/or new possessions; possession of weapons.

As a school we have a duty to not only prevent the individual from engaging in criminal activity, but also to safeguard others who may be harmed by their actions.

We will report concerns of serious violence to police and social care.

If there is information or intelligence about potential serious violence, we will report this to the police via the community partnership information form.

<https://www.safe4me.co.uk/portfolio/sharing-information/>

Trafficked children and modern slavery

Human trafficking is defined by the UNHCR in respect of children as a process that is a combination of:

- Movement (including within the UK);
- Control, through harm / threat of harm or fraud
- For the purpose of exploitation.

Any child transported for exploitative reasons is considered to be a trafficking victim. There is significant evidence that children (both of UK and other citizenship) are being trafficked internally within the UK and this is regarded as a more common form of trafficking in the UK.

There are a number of indicators which suggest that a child may have been trafficked into the UK, and may still be controlled by the traffickers or receiving adults. These are as follows:

- Shows signs of physical or sexual abuse, and/or has contracted a sexually transmitted infection or has an unwanted pregnancy
- Has a history with missing links and unexplained moves
- Is required to earn a minimum amount of money every day
- Works in various locations
- Has limited freedom of movement
- Appears to be missing for periods
- Is known to beg for money
- Is being cared for by adult(s) who are not their parents and the quality of the relationship between the child and their adult carers is not good
- Is one among a number of unrelated children found at one address
- Has not been registered with or attended a GP practice
- Is excessively afraid of being deported.

For those children who are internally trafficked within the UK indicators include:

- Physical symptoms (bruising indicating either physical or sexual assault)
- Prevalence of a sexually transmitted infection or unwanted pregnancy
- Reports from reliable sources suggesting the likelihood of involvement in sexual exploitation / the child has been seen in places known to be used for sexual exploitation
- Evidence of drug, alcohol or substance misuse
- Being in the community in clothing unusual for a child, i.e. inappropriate for age, or borrowing clothing from older people
- Relationship with a significantly older partner
- Accounts of social activities, expensive clothes, mobile phones or other possessions with no plausible explanation of the source of necessary funding
- Persistently missing, staying out overnight or returning late with no plausible explanation
- Returning after having been missing, looking well cared for despite having not been at home
- Having keys to premises other than those known about
- Low self- image, low self-esteem, self-harming behaviour including cutting, overdosing, eating disorder, promiscuity
- Truancy / disengagement with education
- Entering or leaving vehicles driven by unknown adults
- Going missing and being found in areas where the child or young person has no known links; and/or
- Possible inappropriate use of the internet and forming on-line relationships, particularly with adults.

These behaviours themselves do not indicate that a child is being trafficked, but should be considered as indicators that this may be the case.

When considering modern slavery, there is a perception that this is taking place overseas. The government estimates that tens of thousands of slaves are in the UK today.

Young people being forced to work in restaurants, nail bars, car washes and harvesting fruit, vegetables or other foods have all been slaves 'hiding in plain sight' within the U.K and rescued from slavery. Other forms of slavery such as sex slaves or household slaves are more hidden but have also been rescued within the UK.

If staff believe that a child is being trafficked or is a slave, this will be reported to the designated safeguarding lead for referral to be considered to children's social care.

Technologies

Technological hardware and software is developing continuously with an increase in functionality of devices that people use. The majority of children use online tools to communicate with others locally, nationally and internationally. Access to the Internet and other tools that technology provides is an invaluable way of finding, sharing and communicating information. While technology itself is not harmful, it can be used by others to make children vulnerable and to abuse them.

Online Safety and Social Media

With the current speed of on-line change, some parents and carers have only a limited understanding of online risks and issues. Parents may underestimate how often their children come across potentially harmful and inappropriate material on the internet and may be unsure about how to respond. Some of the risks could be:

- unwanted contact
- grooming
- online bullying, including 'sexting'
- digital footprint

The school will therefore seek to provide information and awareness to both pupils and their parents through:

- Acceptable use agreements for children, teachers, parents/carers and governors
- Curriculum activities involving raising awareness around staying safe online
- Information included in letters, newsletters, web site, VLE
- Parents evenings / sessions
- High profile events / campaigns
- Building awareness around information that is held on relevant web sites and or publications
- Social media policy.

Cyberbullying

Central to the school's anti-bullying policy is the principle that '*bullying is always unacceptable*' and that '*all pupils have a right not to be bullied*'.

The federation also recognises that it must take note of bullying perpetrated outside school which spills over into the school; therefore, once aware, we will respond to any cyber-bullying we become aware of carried out by pupils when they are away from the site. Cyber-bullying is defined as 'an aggressive, intentional act carried out by a group or individual using electronic forms of contact repeatedly over time against a victim who cannot easily defend himself/herself.'

By cyber-bullying, we mean bullying by electronic media:

- Bullying by texts or messages or calls on mobile 'phones
- The use of mobile phone cameras to cause distress, fear or humiliation
- Posting threatening, abusive, defamatory or humiliating material on websites, to include blogs, personal websites, social networking sites
- Using e-mail to message others
- Hijacking/cloning e-mail accounts
- Making threatening, abusive, defamatory or humiliating remarks in on-line forums.

Cyber-bullying may be at a level where it is criminal in character. It is unlawful to disseminate defamatory information in any media, including internet sites.

Section 127 of the Communications Act 2003 makes it an offence to send, by public means of a public electronic communications network, a message or other matter that is grossly offensive or one of an indecent, obscene or menacing character.

The Protection from Harassment Act 1997 makes it an offence to knowingly pursue any course of conduct amounting to harassment.

If we become aware of any incidents of cyberbullying, we will need to consider each case individually as to any criminal act that may have been committed. The federation will pass on information to the police if it feels that it is appropriate or is required to do so.

Sexting

'Sexting' often refers to the sharing of naked or 'nude' pictures or video through mobile phones and/or the internet. It also includes underwear shots, sexual poses and explicit text messaging.

While sexting often takes place in a consensual relationship between two young people, the use of sexted images in revenge following a relationship breakdown is becoming more commonplace. Sexting can also be used as a form of sexual exploitation and take place between strangers.

As the average age of first smartphone or camera enabled tablet is 6 years old, sexting is an issue that requires awareness raising across all ages.

The schools will use age appropriate educational material to raise awareness, to promote safety and deal with pressure. Parents should be aware that they can come to the school for advice.

Gaming

Online gaming is an activity in which the majority of children and many adults get involved. The school will raise awareness:

- By talking to parents and carers about the games their children play and help them identify whether they are appropriate
- By supporting parents in identifying the most effective way to safeguard their children by using parental controls and child safety mode
- By talking to parents about setting boundaries and time limits when games are played
- By highlighting relevant resources.

Online reputation

Online reputation is the opinion others get of a person when they encounter them on-line. It is formed by posts, photos that have been uploaded and comments made by others on people's profiles. It is important that children and staff are aware that anything that is posted could influence their future professional reputation. The majority of organisations and work establishments now check digital footprint before considering applications for positions or places on courses.

Grooming

On-line grooming is the process by which one person with an inappropriate sexual interest in children will approach a child on-line, with the intention of developing a relationship with that child, to be able to meet them in person and intentionally cause harm.

The schools in the federation will build awareness amongst children and parents about ensuring that the child:

- Only has friends on-line that they know in real life
- Is aware that if they communicate with somebody that they have met on-line, that relationship should stay on-line.

The schools will support parents to:

- Recognise the signs of grooming
- Have regular conversations with their children about on-line activity and how to stay safe on-line

The schools will raise awareness by:

- Running sessions for parents
- Include awareness around grooming as part of their curriculum
- Identifying with parents and children how they can be safeguarded against grooming.

Part 2 – Safeguarding issues relating to individual pupil needs

Homelessness

As a federation, we recognise that being homeless or being at risk of becoming homeless presents a real risk to a child's welfare. The impact of losing a place of safety and security can affect a child's behaviour and attachments.

In line with the Homelessness Reduction Act 2017 this school will promote links into the Local Housing Authority for the parent or care giver in order to raise/progress concerns at the earliest opportunity.

We recognise that whilst referrals and/or discussion with the Local Housing Authority should be progressed as appropriate, this does not, and should not, replace a referral into children's social care where a child has been harmed or is at risk of harm.

Children & the Court System

As a federation, we recognise that children are sometimes required to give evidence in criminal courts, either for crimes committed against them or for crimes they have witnessed. We know that this can be a stressful experience and therefore the school will aim to support children through this process.

Along with pastoral support, the school will use age-appropriate materials published by HM Courts and Tribunals Services (2017) that explain to children what it means to be a witness, how to give evidence and the help they can access.

We recognise that making child arrangements via the family courts following separation can be stressful and entrench conflict in families. This can be stressful for children. Our schools will support children going through this process.

Alongside pastoral support the schools will use online materials published by The Ministry of Justice (2018) which offer children information & advice on the dispute resolution service.

These materials will also be offered to parents and carers if appropriate.

Children with family members in prison

Children who have a family member in prison are at greater risk of poor outcomes, including poverty, stigma, isolation and poor mental health.

This federation aims to:

- Understand and Respect the Child's Wishes

We will respect the child's wishes about sharing information. If other children become aware the school will be vigilante to potential bullying or harassment.

- **Keep as Much Contact as Possible with the Parent and Caregiver**
We will maintain good links with the remaining caregiver in order to foresee and manage any developing problems. Following discussions, we will develop appropriate systems for keeping the imprisoned caregiver updates about their child's education.
- **Be Sensitive in Lessons**
This school will consider the needs of any child with an imprisoned parent during lesson planning.
- **Provide Extra Support**
We recognise that having a parent in prison can attach a real stigma to a child, particularly if the crime is known and particularly serious. We will provide support and mentoring to help a child work through their feelings on the issue.

Alongside pastoral care, the schools will use the resources provided by the National Information Centre on Children of Offender in order to support and mentor children in these circumstances.

Pupils with medical conditions (in school)

There is a separate policy outlining the federation's position on this, which can be found on the school websites.

As a federation, we will make sure that sufficient staff are trained to support any pupil with a medical condition.

All relevant staff will be made aware of the condition so they can support the child and be aware of medical needs and risks to the child.

An individual healthcare plan may be put in place to support the child and their medical needs.

Pupils with medical conditions (out of school)

There will be occasions when children are temporarily unable to attend our schools on a full-time basis because of their medical needs. These children and young people are likely to be:

- children and young people suffering from long-term illnesses
- children and young people with long-term post-operative or post-injury recovery periods
- children and young people with long-term mental health problems (emotionally vulnerable).

Where it is clear that an absence will be for more than 15 continuous school days, the Education and Inclusion branch of Children Services will be contacted to support with the pupil's education.

Special educational needs and disabilities

Children who have special educational needs and/or disabilities can have additional vulnerabilities when recognising abuse and neglect. These can include:

- Assumptions that indicators of possible abuse such as behaviour, mood and injury relate to the child's disability without further exploration
- The potential for children with SEN and disabilities being disproportionately impacted by behaviours such as bullying, without outwardly showing any signs
- Communication barriers and difficulties in overcoming these barriers
- Have fewer outside contacts than other children
- Receive intimate care from a considerable number of carers, which may increase the risk of exposure to abusive behaviour and make it more difficult to set and maintain physical boundaries
- Have an impaired capacity to resist or avoid abuse
- Have communication difficulties that may make it difficult to tell others what is happening
- Be inhibited about complaining for fear of losing services
- Be especially vulnerable to bullying and intimidation
- Be more vulnerable than other children to abuse by their peers.

As a federation we will respond to this by:

- Making it common practice to enable disabled children to make their wishes and feelings known in respect of their care and treatment
- Ensuring that disabled children receive appropriate personal, health and social education (including sex education)
- Making sure that all disabled children know how to raise concerns and give them access to a range of adults with whom they can communicate. This could mean using interpreters and facilitators who are skilled in using the child's preferred method of communication
- Recognising and utilising key sources of support including staff in schools, friends and family members where appropriate
- Developing the safe support services that families want, and a culture of openness and joint working with parents and carers on the part of services
- Ensuring that guidance on good practice is in place and being followed in relation to: intimate care; working with children of the opposite sex; managing behaviour that challenges families and services; issues around consent to treatment; anti-bullying and inclusion strategies; sexuality and safe sexual behaviour among young people; monitoring and challenging placement arrangements for young people living away from home.

Intimate and personal care

'Intimate Care' can be defined as care tasks of an intimate nature, associated with bodily functions, bodily products and personal hygiene, which demand direct or indirect contact with, or exposure of, the sexual parts of the body. The Intimate Care tasks specifically identified as relevant include:

- Dressing and undressing (underwear)
- Helping someone use the toilet
- Changing continence pads (faeces/urine)
- Bathing / showering
- Washing intimate parts of the body
- Changing sanitary wear
- Inserting suppositories
- Giving enemas
- Inserting and monitoring pessaries.

'Personal Care' involves touching another person, although the nature of this touching is more socially acceptable. These tasks do not invade conventional personal, private or social space to the same extent as Intimate Care.

Those Personal Care tasks specifically identified as relevant here include:

- Skin care/applying external medication
- Feeding
- Administering oral medication
- Hair care
- Dressing and undressing (clothing)
- Washing non-intimate body parts
- Prompting to go to the toilet.

Personal Care encompasses those areas of physical and medical care that most people carry out for themselves but which some are unable to do because of disability or medical need. Children and young people may require help with eating, drinking, washing, dressing and toileting.

Where Intimate Care is required we will follow the following principles:

1. Involve the child in the intimate care

Try to encourage a child's independence as far as possible in his or her intimate care. Where a situation renders a child fully dependent, talk about what is going to be done and give choices where possible. Check your practice by asking the child or parent about any preferences while carrying out the intimate care.

2. Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation.

Staff can administer intimate care alone however we will be aware of the potential safeguarding issues for the child and member of staff. Care should be taken to

ensure adequate supervision primarily to safeguard the child but also to protect the staff member from potential risk.

3. Be aware of your own limitations

Only carry out activities you understand and with which you feel competent. If in doubt, ASK. Some procedures must only be carried out by members of staff who have been formally trained and assessed.

4. Promote positive self-esteem and body image

Confident, self-assured children who feel their body belongs to them are less vulnerable to sexual abuse. The approach you take to intimate care can convey lots of messages to a child about their body worth. Your attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be both efficient and relaxed.

5. If you have any concerns you must report them.

If you observe any unusual markings, discolouration or swelling, report it immediately to the designated practitioner for child protection.

If a child is accidentally hurt during the intimate care or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to the DSL. Report and record any unusual emotional or behavioural response by the child. A written record of concerns must be made available to parents and kept in the child's child protection record.

6. Helping through communication

There is careful communication with each child who needs help with intimate care in line with their preferred means of communication (verbal, symbolic, etc.) to discuss the child's needs and preferences. The child is aware of each procedure that is carried out and the reasons for it.

7. Support to achieve the highest level of autonomy

As a basic principle children will be supported to achieve the highest level of autonomy that is possible, given their age and abilities. Staff will encourage each child to do as much for themselves as they can. This may mean, for example, giving the child responsibility for washing themselves. Individual intimate care plans will be drawn up for particular children as appropriate to suit the circumstances of the child. These plans include a full risk assessment to address issues such as moving and handling, personal safety of the child and the carer and health.

Fabricated or induced illness

There are three main ways that a carer could fabricate or induce illness in a child. These are not mutually exclusive and include:

- fabrication of signs and symptoms. This may include fabrication of past medical history
- fabrication of signs and symptoms and falsification of hospital charts and records, and specimens of bodily fluids. This may also include falsification of letters and documents
- induction of illness by a variety of means.

If we are concerned that a child may be suffering from fabricated or induced illness, we will inform children's social care.

Mental Health

Form tutors and class teachers see their pupils day in, day out. They know them well and are well placed to spot changes in behaviour that might indicate an emerging problem with the mental health and emotional wellbeing of pupils.

The balance between the risk and protective factors are most likely to be disrupted when difficult events happen in pupils' lives. These include:

- **loss or separation** – resulting from death, parental separation, divorce, hospitalisation, loss of friendships (especially in adolescence), family conflict or breakdown that results in the child having to live elsewhere, being taken into care or adopted
- **life changes** – such as the birth of a sibling, moving house or changing schools or during transition from primary to secondary school, or secondary school to sixth form
- **traumatic events** such as abuse, domestic violence, bullying, violence, accidents, injuries or natural disaster.

When concerns are identified, school staff will provide opportunities for the child to talk or receive support within the school environment. Parents will be informed of the concerns and a shared way to support the child will be discussed.

Where the needs require additional professional support referrals will be made to the appropriate team or service with the parent's agreement or child's if they are considered to be competent.

Part 3 – Other safeguarding issues that may potentially have an impact on pupils

Bullying

The federation has a separate bullying policy that can be found on the school websites.

Prejudice based abuse

Prejudice based abuse or hate crime is any criminal offence which is perceived by the victim or any other person to be motivated by a hostility or prejudice based on a person's real or perceived:

- Disability
- Race
- Religion
- Gender identity
- Sexual orientation

Although this sort of crime is collectively known as 'Hate Crime', the offender doesn't have to go as far as being motivated by 'hate', they only have to exhibit 'hostility'.

This can be evidenced by:

- threatened or actual physical assault
- derogatory name calling, insults; for example, racist jokes or homophobic language
- hate graffiti (e.g. on school furniture, walls or books)
- provocative behaviour e.g. wearing of badges or symbols belonging to known right wing or extremist organisations
- distributing literature that may be offensive in relation to a protected characteristic
- verbal abuse
- inciting hatred or bullying against pupils who share a protected characteristic
- prejudiced or hostile comments in the course of discussions within lessons
- teasing in relation to any protected characteristic e.g. sexuality, language, religion or cultural background
- refusal to co-operate with others because of their protected characteristic, whether real or perceived
- expressions of prejudice calculated to offend or influence the behaviour of others
- attempts to recruit other pupils to organisations and groups that sanction violence, terrorism or hatred.

As a federation, we will respond by:

- clearly identifying prejudice based incidents and hate crimes and monitor the frequency and nature of them within the school

- taking preventative action to reduce the likelihood of such incidents occurring
- recognising the wider implications of such incidents for the school and local community
- providing regular reports of these incidents to the Governing Body
- ensuring that staff are familiar with formal procedures for recording and dealing with prejudice based incidents and hate crimes
- dealing with perpetrators of prejudice based abuse effectively
- supporting victims of prejudice based incidents and hate crimes
- ensuring that staff are familiar with a range of restorative practices to address bullying and prevent it happening again.

Drugs and substance misuse

Please refer to the *government guidance on the safeguarding in education for information on substance abuse in primary schools*.

Faith Abuse

The number of known cases of child abuse linked to accusations of ‘possession’ or ‘witchcraft’ is small, but children involved can suffer damage to their physical and mental health, their capacity to learn, their ability to form relationships and to their self-esteem. Such abuse generally occurs when a carer views a child as being ‘different’, attributes this difference to the child being ‘possessed’ or involved in ‘witchcraft’ and attempts to exorcise him or her.

A child could be viewed as ‘different’ for a variety of reasons such as, disobedience; independence; bed-wetting; nightmares; illness; or disability. There is often a weak bond of attachment between the carer and the child.

There are various social reasons that make a child more vulnerable to an accusation of ‘possession’ or ‘witchcraft’. These include family stress and/or a change in the family structure.

The attempt to ‘exorcise’ may involve severe beating, burning, starvation, cutting or stabbing and isolation, and usually occurs in the household where the child lives.

If the school becomes aware of a child who is being abused in this context, the DSL will follow the normal referral route in to children’s social care.

Gangs and Youth Violence

The vast majority of young people will not be affected by serious violence or gangs. However, where these problems do occur, even at low levels there will almost certainly be a significant impact.

As a federation, we have a duty and a responsibility to protect our pupils. It is also well established that success in learning is one of the most powerful indicators in the prevention of youth crime. Dealing with violence also helps attainment. While pupils generally see educational establishments as safe places, even low levels of youth violence can have a disproportionate impact on any education.

Primary schools are also increasingly recognised as places where early warning signs that younger children may be at risk of getting involved in gangs can be spotted. Crucial preventive work can be done within school to prevent negative behaviour from escalating and becoming entrenched.

As a school we will:

- develop skills and knowledge to resolve conflict as part of the curriculum
- challenge aggressive behaviour in ways that prevent the recurrence of such behaviour
- understand risks for specific groups, including those that are gender-based, and target interventions
- safeguard, and specifically organise child protection, when needed
- make referrals to appropriate external agencies
- carefully manage individual transitions between educational establishments especially into Pupil Referral Units (PRUs) or alternative provision
- work with local partners to prevent anti-social behaviour or crime.

Private fostering

Private fostering is an arrangement by a child's parents for their child (under 16 or 18 if disabled) to be cared for by another adult, who is not closely related and is not a legal guardian with parental responsibility, for 28 days or more.

It is not private fostering if the carer is a close relative to the child such, as grandparent, brother, sister, uncle or aunt.

The Law requires that the carers and parents must notify the Children's Services Department of any private fostering arrangement.

If either school becomes aware that a pupil is being privately fostered, we will inform the Children's Services Department and inform both the parents and carers that we have done so.

Parenting

All parents will struggle with the behaviour of their child(ren) at some point. This does not make them poor parents or generate safeguarding concerns. Rather, it makes them human and provides them with opportunities to learn and develop new skills and approaches to deal with their child(ren).

Some children have medical conditions and/or needs e.g. Tourette's Syndrome, some conditions associated with autism or ADHD, that have a direct impact on behaviour and can cause challenges for parents in dealing with behaviours. This does not highlight poor parenting either.

Parenting becomes a safeguarding concern when the repeated lack of supervision, boundaries, basic care or medical treatment places the child(ren) in situations of risk or harm.

In situations where parents struggle with tasks such as setting boundaries and providing appropriate supervision, timely interventions can make drastic changes to the wellbeing and life experiences of the child(ren) without the requirement for a social work assessment or plan being in place.

As a federation, we will support parents in understanding the parenting role and provide them with strategies to make a difference by:

- providing details of community based parenting courses <http://www3.hants.gov.uk/childrens-services/familyinformationdirectory.htm>
- linking to web based parenting resources (for example <http://www.familylives.org.uk/>)
- referring to the school parenting worker/home school link worker (where available)
- discussing the issue with the parent and supporting them in making their own plans of how to respond differently (using evidence based parenting programmes)
- Considering appropriate early help services <http://www3.hants.gov.uk/childrens-services/childrens-trust/earlyhelp.htm>

Part 4 –Safeguarding processes

Safer Recruitment

The school operates a separate safer recruitment process as part of its Recruitment Policy. On all recruitment panels there is at least one member who has undertaken safer recruitment training.

The recruitment process checks the identity, criminal record (enhanced DBS), mental and physical capacity, right to work in the U.K., professional qualification and seeks confirmation of the applicant's experience and history through references.

Staff Induction

The DSL or their deputy will provide all new staff with training to enable them to both fulfil their role and also to understand the child protection policy, the safeguarding policy, the staff behaviour policy/code of conduct, and part one of Keeping Children Safe in Education.

This induction may be covered within the annual training if this falls at the same time; otherwise it will be carried out separately during the initial starting period.

Health and Safety

The site, the equipment and the activities carried out as part of the curriculum are all required to comply with the Health and Safety at Work act 1974 and regulations made under the act.

All risks are required to be assessed and recorded plans of how to manage the risk are in place. The plans should always take a common sense and proportionate approach to allow activities to be safe rather than preventing them from taking place. The school has a Health and Safety policy which details the actions that we take in more detail.

Site Security

We aim to provide a secure site, but recognise that the site is only as secure as the people who use it. Therefore, all people on the site have to adhere to the rules which govern it. These are:

- Doors are kept closed to prevent intrusion
- Visitors and volunteers enter at the reception and must sign in
- Visitors and volunteers are identified by lanyards.
- Children are only allowed home during the school day with adults/carers with parental responsibility or permission being given
- All children leaving or returning during the school day have to sign out and in

- Empty classrooms have windows closed.

Off site visits

A particular strand of health and safety is looking at risks when undertaking off site visits. Some activities, especially those happening away from the school and residential visits, can involve higher levels of risk. If these are annual or infrequent activities, a review of an existing assessment may be all that is needed. If it is a new activity, a visit involving adventure activities, residential, overseas or an 'Open Country' visit, a specific assessment of significant risks must be carried out. Each of the schools in the federation has an educational visits co-ordinator (EVC) who liaises with the local authority's outdoor education adviser and helps colleagues in the schools to manage risks and support with off site visits and provides training in the management of groups during off site visits, as well as First Aid in an outdoor context.

First Aid

There is a separate First Aid policy which can be found on the website (it forms part of the Health & Safety policy).

Physical Intervention (use of reasonable force)

As a federation, we have a separate policy outlining how we will use physical intervention. This can be found on the school websites.

Taking and the use and storage of images

As a federation, we will seek consent from the parent of a pupil and from teachers and other adults before taking and publishing photographs or videos that contain images that are sufficiently detailed to identify the individual in school publications, printed media or on electronic publications.

We will not seek consent for photos where you would not be able to identify the individual.

We will seek consent for the period the pupil remains registered with us and, unless we have specific written permission, we will remove photographs after a child (or teacher) appearing in them leaves the school or if consent is withdrawn.

Photographs will only be taken on school owned equipment and stored on school networks. No images of pupils will be taken or stored on privately owned equipment by staff members.

Transporting pupils

<http://documents.hants.gov.uk/education/LADOsafeguardingchildrenineducation2014templatabletterforparent.doc>

On occasions, parents and volunteers support with the task of transporting children to visits and off-site activities arranged by the schools in the federation. (This is in addition to any informal arrangements made directly between parents for after school clubs etc.)

In managing these arrangements, the schools will put in place measures to ensure the safety and welfare of young people carried in parents' and volunteers' cars. This is based on guidance from the local authority and follows similar procedures for school staff using their cars on school business.

Where parents'/volunteers' cars are used on school activities, the schools will notify parents/volunteers of their responsibilities for the safety of pupils, to maintain suitable insurance cover and to ensure their vehicle is roadworthy.

All parents/volunteers are therefore asked to complete and return a form to the school before they offer to use their car to help with transporting pupils.

.

Disqualification under the childcare act

The Childcare Act of 2006 was put in place to prevent adults who have been cautioned or convicted of a number of specific offences from working within childcare. Previously this disqualification also extended to risk by association of anyone living within the same household and required us to carry out a self-disclosure process with staff.

The risk by association element of the Act has now been refocused by the DfE and no longer applies to school staff.

We will continue to check for disqualification under the Childcare Act as part of our safer recruitment processes for any offences committed by staff members or volunteers.

Annex 1 - Table of changes

Changes to grammar, punctuation, spelling and sentence structure have been made throughout the document. In addition to these minor changes the following have been made.

Page	Section	Changes
	Whole document	Changed references from KCSiE 2018 to KCSiE 2019 Changed references from HSCB to HSCP and board to partnership where appropriate Ofsted inspection framework changed from 2016 to 2019 Spelling and grammar changes made as needed
3	Links	Changed link to the HSCP procedures page
6	Definitions	Change in the staff definition to parent volunteers from parents
11	Upskirting	New section inserted
18	CSE	CPI form imbedded in the document deleted. Link to Safe4me page inserted instead.
18	CCE	Added link to CPI form
19	Serious violence	Added new section and link to CPI form
36	Transporting pupils	Changed from 'completing the form attached as annex 3' to 'completing the form attached in the link'
Annex1	CPI form	Deleted hard copy of CPI form as per page 18
Annex 2	Table of changes	Renumbered as Annex 1 from Annex 2
